Private Practice by Doctor of E. S. I. Hospital

706. SRI J. P. SARWESH (Sedam).—Will the Minister for Health be pleased to state:—

(a) whether the Doctors working in E. S. I. Hospitals, are doing private practice in the evenings in open clinics though they are getting N. P. A.;

(b) what is the additional work being turned out by them for the payment of N. P. A.;

(c) whether other Government doctors are allowed to do private practice at their residence outside Hospital hours;

(d) if so, the reasons;

(e) whether Government intend to have a uniform rule either to allow private practice or do away with it strictly by giving adequate N. P. A. as being done by Central Government?

† SRI H. SIDDAVEERAPPA (Minister for Health).—

(a) No.

(b) The N. P. A. is paid as they are prohibited from undertaking private practice and not for handing additional work.

(c) The other Government doctors are not allowed to undertake private practice, but are allowed to do consultancy work at their residences outside their hours of duty and without detriment to their official duties.

(d) The rules of the E. S. I. Corporation prohibit private practice.

(e) This question will be examined.

SRI J. P. SARWESH.—I would like to know how much time the Government requires to examine this question to bring uniformity?

SRI H. SIDDAVEERAPPA.—The matter is already under the examination of the Commissioner; a decision will be taken early.
